

# 7 SIMPLE TIPS TO RECYCLE MORE AT HOME

ENAVA

THE  
WASTE  
PAPER CO.

1

## Recycle. Recycle. Recycle...

Recycling 1 tonne of paper saves around 30,000 litres of water and 17 trees! Recycling paper and cardboard is easy to do- make it a priority if it isn't already.

2

## Reuse carrier bags...

Bring your own bags with you when you go shopping to avoid collecting more plastic carrier bags which are hard to recycle.

3

## Sign up with your local library...

This is a great way to recycle books time and time again — books are re-read and reused multiple times by multiple readers! Plus it will save you money and save on clutter in your house.

#### 4 Rain Barrel...

Buy a rain barrel to collect rainwater to use when watering your plants to save on water usage.

#### 5 Reusable bottle...

Bring a reusable water bottle (ideally stainless steel not plastic) with you everywhere you go rather than buying bottled water — bottles that may end up in landfill. Ask your parents to invest in a reusable travel cup — some coffee chains will even offer a discount for filling up their own cup rather than giving them a paper one.

#### 6 Go vegetarian once a week...

You don't have to give up meat but try to commit to one vegetarian or plant-based day a week. It takes 2,500 gallons of water to produce one pound of beef!

#### 7 Reward chart...

Set up a family reward chart and decide on a treat for everyone to enjoy when you've reached your recycling and eco goals!
